

Storyboard 1 – Charging Status Indicator

- **Setting:** A bedroom nightstand or desk, at night or during the day when the phone needs charging.
- **Players:** The phone owner.
- **Activity:** The user places their phone on the wireless charger and glances at the light to check charging progress.
- **Goals:**
 - **User:** To know when the phone is fully charged without unlocking it.
 - **Device:** To communicate charging status clearly using light colour.

Storyboard 2 – Smart Entryway Weather Indicator

- **Setting:** House entryway.
- **Players:** The person living in the house (and potentially family/housemates).
- **Activity:** The user checks the light above the door before heading outside.
- **Goals:**
 - **User:** To know if they need an umbrella, coat, or other gear before going out.
 - **Device:** To indicate good or bad weather quickly.

Storyboard 3 – Remote Locator

- **Setting:** Living room.
- **Players:** The person watching TV.
- **Activity:** The user notices the remote is missing, uses the app to trigger the light on the remote, and retrieves it.
- **Goals:**
 - **User:** To find the remote quickly and avoid wasting time searching.
 - **Device:** To make the remote's location obvious through a glowing light.

Storyboard 4 – Smart Mailbox

- **Setting:** Outside the house or at the apartment mailbox area, any time mail is expected.
- **Players:** Resident, mail carrier.
- **Activity:** The resident looks at the mailbox light before walking to it.
- **Goals:**
 - **User:** To avoid checking an empty mailbox unnecessarily or to check at night.
 - **Device:** To signal whether mail has been delivered (green = empty, red = full).

Storyboard 5 – Smart Pot

- **Setting:** Kitchen stove area.
- **Players:** Home cook, pot, stove.
- **Activity:** The user puts water to boil, and the pot detects temperature rise, turning on a light when boiling point is reached.
- **Goals:**
 - **User:** To know when water reaches boiling without constantly watching.
 - **Device:** To visually alert user with light when boiling is complete.

Storyboard 6 – Sunrise Alarm Light

- **Setting:** Bedroom, early morning before wake-up time.
- **Players:** User (sleeping person).
- **Activity:** Light gradually brightens before wake-up time to simulate sunrise.
- **Goals:**
 - **User:** To wake up more naturally and gently.
 - **Device:** To gradually prepare user's body for waking by increasing light brightness.

Storyboard 7 – Fish Tank Monitor

- **Setting:** Living room or wherever the fish bowl is placed, throughout the day.
- **Players:** Fish, fish owner.
- **Activity:** Light on the lid indicates water quality. Owner refills or cleans water when needed.
- **Goals:**
 - **User:** To maintain healthy water for the fish and know when it needs changing.
 - **Device:** To alert user to water condition through light colour changes.
